

CG CRM Project Overview

Product Vision Document

Introduction

Problem Statement

Chiranjeev Gurukul uses a manual approach to Customer Relationship Management (CRM) for customer interactions, sales opportunities, and business operations. The team relies on manual processes for lead assignment, follow-up management, and customer communication, resulting in delayed responses, inconsistent sales processes, duplicate customer records, and limited visibility into the sales pipeline. Reporting capabilities are limited, making it difficult for management to monitor business performance and make informed decisions.

To address these challenges, the organization intends to enhance the CRM by introducing advanced lead management, workflow automation, opportunity tracking, customer lifecycle management, integrated communication channels, and comprehensive reporting. The enhanced CRM will provide a centralized platform that improves collaboration across departments, increases employee productivity, enhances customer experience, and supports future business growth through scalable and configurable solutions.

As the organization wish to expand its offerings and infrastructure, the CRM is proposed to be the foundation for the digital infrastructure upgrade.

Business Goals

The primary business goals of the CRM Enhancement Project are to improve customer relationship management, optimize sales operations, and increase business productivity through automation and data-driven decision-making.

- Improve customer acquisition through efficient lead management.
- Enhance customer engagement by providing a 360-degree customer view.
- Increase sales conversion by streamlining the lead-to-opportunity process.
- Improve customer retention through proactive follow-ups and personalized interactions.
- Standardize business processes across Sales, Marketing, and Customer Support teams.
- Increase operational efficiency by automating repetitive business activities.
- Improve decision-making through real-time dashboards and business analytics.
- Strengthen data quality by eliminating duplicate records and maintaining a centralized customer repository.
- Enhance collaboration among business teams through a unified CRM platform.
- Build a scalable CRM solution that supports future business growth and additional integrations.

Business Objectives

Sales Objectives

- Reduce lead response time from 18 hours to less than 2 hours.
- Increase lead conversion rate by at least 20%.
- Reduce the average sales cycle by 25%.
- Improve sales forecast accuracy to over 90%.
- Increase sales team productivity by automating manual activities.

Customer Management Objectives

- Provide a complete 360° customer profile containing all interactions, activities, opportunities, and support history.
- Reduce duplicate customer records by at least 95%.
- Improve customer satisfaction by enabling faster issue resolution and better communication.

Operational Objectives

- Automate lead assignment using configurable business rules.
- Automate follow-up reminders, task creation, and notification workflows.
- Reduce manual data entry through third-party integrations and automated data capture.
- Improve cross-functional collaboration between Sales, Marketing, and Customer Support teams.
- Reporting Objectives
- Provide real-time dashboards for executives, managers, and operational users.
- Enable users to generate customizable reports with filtering and export capabilities.
- Deliver actionable insights into sales performance, pipeline health, marketing effectiveness, and customer support metrics.

Security & Compliance Objectives

- Implement role-based access control (RBAC) to secure customer data.
- Maintain a complete audit trail for all critical business transactions.
- Ensure secure storage and transmission of customer information in compliance with organizational security standards.

Scalability Objectives

- Support increasing business volume without significant performance degradation.
- Enable easy integration with Email, Calendar, ERP, Marketing Automation, Payment Gateway, Dashboarding tools, Whatsapp, Cloud database, and other enterprise applications.
- Provide a configurable CRM platform capable of supporting future business requirements without major redevelopment.

SMART Goals

Business Objective	Metric	Target	Source
Reduce lead response time	Avg. time from Lead creation to first contact	< 2 hours	Lead Performance Report
Increase lead conversion rate	Leads Converted / Leads Created	20%	Lead Performance Report
Reduce duplicate customer records	Duplicate records detected at merge / total records	-95%	Admin data-quality dashboard
Improve sales forecast accuracy	Forecast Revenue vs. Actual Closed Revenue variance	< 10% variance	Revenue Forecast Report
Reduce average sales cycle	Days from Lead creation to Opportunity Closed-Won	-25%	Sales Pipeline Report

CRM Scope - MVP

- Dashboard
- Lead Management
- Customer Management
- Opportunity/Sales Pipeline
- Marketing Campaigns
- Customer Support
- Administration

Scope / out of scope

In Scope Functionality

Sales Users:

- Login, Dashboard, Lead Capture, Lead Qualification, Lead Assignment, Lead Scoring
- Contact Management, Opportunity Management, Pipeline View, Calendar
- Follow-up Tasks, Email Integration, Call Logs, Meeting Scheduling
- Quote Generation, Customer Timeline

Marketing Users:

- Campaign Management, Email Campaigns, Customer Segmentation
- Landing Pages, Lead Nurturing, Marketing Reports

Customer Support:

- Ticket Creation, Ticket Assignment, SLA Tracking, Escalation, Customer History, Invoicing

Admin:

- User Management, Role Management, Workflow Configuration, Approval Rules
- Product Management, Dashboard Management, Reports, API Configuration, Audit Logs, Security

Out of Scope Functionality

- ERP
- Payroll
- HRMS
- Accounting

User Roles

Visitors: Submit enquiry or lead capture forms; browse public information; contact sales; subscribe to marketing communications; schedule a demo. Cannot access CRM data or customer information.

Sales Executive: Login, view personalized dashboard, create/edit/manage leads, qualify leads, convert to contacts and opportunities, manage customer profiles, schedule calls/meetings/follow-ups, log interactions, generate quotations, update pipeline stages, view own reports.

Sales Manager: View team dashboard and pipeline, assign leads, monitor team KPIs, approve discounts/quotations, review forecasts, reassign opportunities, configure territories, access org-wide sales reports.

Marketing Executive: Create/manage campaigns, design email campaigns and journeys, manage landing pages and lead capture forms, segment customers, execute nurturing, track ROI, import/export lists.

Customer Support Executive/Coordinator: Create/manage tickets, assign and update status, view customer history, escalate cases, send invoices, track SLA compliance, add notes, close tickets with resolution codes.

CRM Administrator: Manage users/roles/permissions, configure workflows/approvals, manage fields/forms/layouts, configure dashboards/reports, maintain master data, manage integrations, monitor audit logs, manage security.

Business Owner / Executive Management: View executive dashboards, monitor revenue/pipeline/acquisition metrics, review KPIs and forecasts, monitor retention/churn, approve strategic decisions.

System Integration User (API / External Systems): Exchange lead/contact/opportunity data with external systems, synchronize with ERP/Accounting/Marketing/Payment Gateways/WhatsApp

High-level modules

The Chiranjeev Gurukul CRM system is designed to streamline and automate the organization's customer relationship management activities, enabling efficient collaboration between Sales, Marketing, Customer Support, and Management teams. The CRM manages the complete customer lifecycle, beginning with lead generation and continuing through lead qualification, opportunity management, sales closure, customer onboarding, post-sales support, and customer retention.

High-level flow: Lead Created-> Sales Executive Receives Lead-> Assignment-> Customer Contact-> Follow-up-> Opportunity-> Quotation-> Deal Won/Lost-> Customer Support.

Detailed process:

- Prospective customers submit enquiries through the website, landing pages, social/email campaigns, referrals, or manual lead entry.
- The CRM captures and validates the lead information while preventing duplicate records.
- New leads are automatically or manually assigned to the appropriate Sales Executive based on predefined assignment rules.
- Sales Executives contact the prospective customer, record communication history, schedule follow-up activities, and update lead status.
- Qualified leads are converted into Customer Contacts and Sales Opportunities.
- Sales Executives manage opportunities through configurable pipeline stages, recording expected revenue, probability, quotations, and customer interactions.
- Sales Managers monitor pipeline progress, approve quotations/discounts where required, review forecasts, and track team performance.
- Marketing teams execute campaigns, segment customers, nurture leads, and analyze campaign effectiveness.
- Customer Support Executives manage service requests, track SLA compliance, escalate unresolved cases, and record resolutions.
- Business users generate operational and analytical reports across lead conversion, sales performance, engagement, and support metrics.
- CRM Administrators manage users, roles, permissions, workflows, integrations, dashboards, reports, and overall configuration.
- Executive Management reviews real-time dashboards and BI reports to support strategic decision-making.

AS-IS-> TO-BE Recommendation

Manual lead assignment-> **Automated, rule-based Lead Assignment with configurable routing by territory/source**

Fragmented communication history-> **Centralized Customer Timeline giving a 360-degree view across calls, emails, meetings, quotes, and tickets**

No follow-up discipline-> **Workflow Automation for reminders, task creation, and overdue tracking**

Duplicate customer records-> **Enforced uniqueness at lead creation plus Admin-controlled merge process**

Limited, manual reporting-> **Configurable real-time dashboards and standard reports with export to Excel/PDF/CSV**

No SLA tracking on Support-> **SLA Tracking & Escalation with breach alerts**

Marketing disconnected from CRM data-> **Native Campaign Management, Segmentation, and Lead Nurturing inside the CRM**

Stakeholder Matrix

Stakeholder	Role / Interest	Influence	Interest	Key Requirements / Concerns	Engagement
Leadership / Sponsor	Business sponsor and decision-maker	High	High	Scalability, business growth, ROI, dashboards, overall CRM adoption	Manage closely
Sales Manager	Owns sales process and team performance	High	High	Lead assignment, pipeline visibility, sales performance, forecasting	Manage closely
Sales Representatives	Primary CRM users	Medium	High	Lead management, follow-ups, customer information, opportunity tracking	Consult / involve frequently
Marketing Team	Lead generation and campaigns	Medium	High	Campaign management, lead sources, segmentation, campaign effectiveness	Consult
Customer Support	Customer service and issue resolution	Medium	High	Customer 360, case management, SLA, escalation	Consult
Program Coordinator / Facilitator	Coordinates programs/customer interactions	Medium	Medium	Customer information, program status, communication history	Consult
Content Team	Supports marketing/customer communication	Low–Medium	Medium	Campaign/content coordination, lead engagement information	Keep informed

CRM Development Team	Builds the solution	High	High	Functional requirements, business rules, integrations, technical feasibility	Collaborate closely
UI/UX	Design high fidelity screens	High	Medium	Screen, flow, user interface, visuals, brand guide	Collaborate closely
QA/Testers	Validates functionality	Medium	High	Acceptance criteria, scenarios, expected results, defects	Collaborate closely
Solution Architect	Defines technical architecture	High	Medium–High	Integrations, data model, security, scalability, technical constraints	Consult closely
Scrum Master	Facilitates Agile delivery	Medium	Medium	Sprint readiness, impediments, ceremonies, team coordination	Collaborate
CRM Administrator	Manages CRM configuration/users	Medium	High	Roles, permissions, workflows, configuration	Consult

Assumptions

- Existing CRM database is available.
- Users have valid login credentials.
- Email server integration is available.
- WhatsApp API is available.
- Existing customer data can be migrated.

Constraints

- Budget
- Timeline
- Third-party API limitations – Graphy, WhatsApp, Zoom, Bank payments,

EPIC

Epic 1 — Core Platform

Story ID	User Story	Priority (MoSCoW)	Points
US-001	As a user, I want to log in securely using my email/password, so that I can access my CRM workspace without friction.	Must	2
US-002	As a user, I want a dashboard tailored to my role, so that I immediately see the information most relevant to my job.	Must	3

Epic 2 — Sales & Opportunity Management

Story ID	User Story	Priority (MoSCoW)	Points
US-003	As a Sales Executive, I want new leads to be captured and validated automatically, so that I don't waste time on duplicates or incomplete records.	Must	5
US-004	As a Sales Executive, I want a single Contact profile with full interaction history, so that I always have context before reaching out to a customer.	Must	3
US-005	As a Sales Executive, I want to track Opportunities through pipeline stages, so that I can manage my deals and forecast revenue accurately.	Must	5
US-006	As a Sales Executive, I want follow-up tasks and reminders created automatically, so that I never miss a commitment to a customer.	Should	5
US-007	As a Sales Executive, I want to send and receive emails directly from the CRM, so that all my customer communication is logged in one place.	Should	5
US-008	As a Sales Executive, I want AI-driven suggestions on which leads to prioritize, so that I spend my time on the deals most likely to close.	Could	8
US-009	As a Sales Executive, I want to generate quotes with automatic discount-approval routing, so that I can move deals forward without bypassing pricing controls.	Must	5
US-010	As a Sales Executive, I want a unified calendar synced with my meetings, calls, and tasks, so that I don't have to check multiple systems for my schedule.	Should	5
US-011	As a Sales Executive, I want to log calls against a customer record, so that my team has a full picture of our conversations.	Should	2
US-012	As a Sales Executive, I want to schedule meetings and send invites from the CRM, so that scheduling doesn't require switching tools.	Should	3

Story ID	User Story	Priority (MoSCoW)	Points
US-013	As a Sales Executive, I want a single timeline of all customer activity, so that I get a 360-degree view without hunting across systems.	Should	3

Epic 3 — Marketing

Story ID	User Story	Priority (MoSCoW)	Points
US-014	As a Marketing Executive, I want to create and track campaigns across channels, so that I can measure what's actually driving leads.	Should	5
US-015	As a Marketing Executive, I want to send templated email campaigns to segmented lists, so that my messaging is relevant and I can measure engagement.	Should	5
US-016	As a Marketing Executive, I want to build customer segments from behavioral and demographic data, so that I can target the right audience for each campaign.	Could	3
US-017	As a Marketing Executive, I want to publish landing pages with lead-capture forms, so that campaign traffic converts directly into CRM leads.	Could	5
US-018	As a Marketing Executive, I want leads to move through an automated nurture sequence, so that they're warmed up before Sales invests time in them.	Could	5
US-019	As a Marketing Executive, I want campaign performance reports, so that I can prove ROI and refine future campaigns.	Could	3

Epic 4 — Customer Support

Story ID	User Story	Priority (MoSCoW)	Points
US-020	As a Support Executive, I want to manage a ticket through its full lifecycle, so that nothing falls through the cracks.	Should	3
US-021	As a Support Executive, I want tickets automatically categorized and prioritized at creation, so that urgent issues are visible immediately.	Must	3
US-022	As a Support Lead, I want tickets auto-assigned by category and priority, so that my team isn't manually playing with every incoming request.	Must	3

Story ID	User Story	Priority (MoSCoW)	Points
US-023	As a Support Lead, I want to be alerted automatically when a ticket is about to breach its SLA, so that I can intervene before we fail the customer.	Must	8
US-024	As a Support Executive, I want to be required to select a resolution code before closing a ticket, so that our resolution data stays meaningful for reporting.	Should	2

Epic 5 — Reporting & Analytics

Story ID	User Story	Priority (MoSCoW)	Points
US-025	As a Sales Manager, I want configurable reports and dashboards, so that I can monitor performance without manually compiling data.	Should	5

Epic 6 — Admin & Platform Configuration

Story ID	User Story	Priority (MoSCoW)	Points
US-026	As a CRM Administrator, I want to manage users and roles, so that access stays secure and aligned to each person's job.	Must	5
US-027	As a CRM Administrator, I want to configure workflow and approval rules without needing a code deployment, so that the business can adapt processes quickly.	Should	8
US-028	As a CRM Administrator, I want to maintain the product/price catalog, so that Sales always quotes with current pricing.	Could	3
US-029	As a CRM Administrator, I want to configure dashboards and reports per role, so that each team sees only what's relevant and permitted.	Should	5
US-030	As a CRM Administrator, I want to configure and monitor third-party integrations, so that failures are caught and resolved before they disrupt the business.	Must	8
US-031	As a CRM Administrator, I want a complete, searchable audit log, so that I can investigate issues and demonstrate compliance.	Must	5

Backlog Summary

By Epic

Epic	Stories	Total Points
Core Platform	2	5
Sales & Opportunity Management	10	49
Marketing	6	26
Customer Support	5	19
Reporting & Analytics	1	5
Admin & Platform Configuration	6	34

By Priority

Priority	Story Count	Suggested Use
Must	12	Required for go-live.
Should	13	Strongly expected at launch.
Could	6	Valuable but deferrable to a later sprint/release if capacity is tight.

Total backlog: 31 stories, 138 story points across 6 epics.

User Stories

US-001: Secure login

As a user, I want to log in securely using my email/password or Google account, so that I can access my CRM workspace without friction.

Business Rules

- BR-001: Only registered and active users can access the CRM.
- BR-002: Users must authenticate using either valid email/password credentials or Google account or through admin approval.
- BR-003: Access to CRM functionality must be determined by the user's assigned role and permissions.
- BR-004: Failed authentication must not provide access to the CRM.

Acceptance Criteria:

- AC1: User must be able to log in using a registered email address and valid password.

- AC2: User must be able to authenticate using their authorized Google account.
- AC3: Invalid email/password combinations must prevent login and display an appropriate error message.
- AC4: Unregistered users must not be granted access to the CRM.
- AC5: Successfully authenticated users must be redirected to their CRM dashboard.
- AC6: User access must be determined by their assigned role and permissions.
- AC7: The system must not expose passwords or authentication credentials in the user interface.

Jira Tasks

- Design login screen.
- Configure authentication.
- Configure Google authentication.
- Implement role-based access.
- Implement authentication error handling.
- QA testing.
- UAT validation.

QA

- Valid login.
- Invalid password.
- Invalid email.
- Unregistered user.
- Google authentication.
- Logout and re-login.
- Role-based access validation.

UAT

Scenario: Sales Executive logs in and accesses the Sales Dashboard.

Expected: User successfully authenticates and sees only authorized CRM functionality.

Representative Defect

DEF-001: Valid user redirected to incorrect dashboard after login.

US 002: Role based dashboard

As a user, I want a dashboard tailored to my role, so that I immediately see the information most relevant to my job.

Business Rules

- BR-005: Dashboard content must be determined by user role.
- BR-006: Users can only view metrics and information authorized for their role.
- BR-007: Dashboard metrics must use approved CRM data and KPI definitions.

Acceptance Criteria:

- AC1: The system must identify the user's assigned role after authentication.
- AC2: The user must see dashboard widgets relevant to their role.
- AC3: Sales users must be able to view relevant sales and lead information.
- AC4: Marketing users must be able to view relevant campaign and lead metrics.
- AC5: Users must not see dashboard information they are not authorized to access.
- AC6: Dashboard data must reflect the latest available CRM data.
- AC7: If dashboard data cannot be retrieved, the system must display an appropriate error/empty state.

Jira Tasks

- Define dashboard requirements by role.
- Create dashboard wireframes.
- Develop dashboard components.
- Configure KPI widgets.
- Configure role-based visibility.
- QA.
- UAT.

QA

- Sales dashboard.
- Marketing dashboard.
- Unauthorized widget access.
- Empty data condition.
- Incorrect/missing data.
- Dashboard refresh.

UAT

Sales Manager verifies that the dashboard provides the required team pipeline and performance information.

Representative Defect

DEF-002: Sales Executive can see Sales Manager-only pipeline metrics.

US 003: Lead capture and validation

As a Sales Executive, I want new leads to be captured and validated automatically, so that I don't waste time on duplicates or incomplete records

Acceptance Criteria:

- AC1: Leads must be capturable from configured lead sources.
- AC2: The system must validate mandatory lead fields before creating a lead.
- AC3: The system must check whether a potential duplicate lead/customer already exists.
- AC4: The system must prevent duplicate creation according to the defined duplicate-matching rules.
- AC5: Invalid or incomplete submissions must not create a valid lead record.
- AC6: The user must receive a clear validation message when required information is missing.
- AC7: Successfully validated leads must be assigned an appropriate initial status.

US-004 — Contact 360 Profile

As a Sales Executive, I want a single Contact profile with full interaction history, so that I always have context before reaching out to a customer.

Acceptance Criteria:

- AC1: Users must be able to search for and open a contact profile.
- AC2: The contact profile must display core customer information.
- AC3: The profile must display available interactions associated with the contact.
- AC4: Interactions must include relevant activities such as calls, emails, meetings and notes.
- AC5: Users must be able to view the interaction history chronologically.
- AC6: Only authorized users may view or modify contact information.
- AC7: Updates to the contact record must be reflected in the profile.

US-005 — Opportunity Pipeline

As a Sales Executive, I want to track Opportunities through pipeline stages, so that I can manage my deals and forecast revenue accurately.

Acceptance Criteria:

- AC1: Users must be able to create an opportunity against an eligible customer/contact.
- AC2: Each opportunity must have a defined pipeline stage.
- AC3: Users must be able to move an opportunity between permitted stages.
- AC4: The system must capture expected revenue for an opportunity.
- AC5: The system must capture probability where required.

- AC6: The system must calculate/display relevant forecast information based on configured business rules.
- AC7: Users must be able to view opportunities by pipeline stage.
- AC8: Opportunities must retain their activity and stage history.

US-006 — Automated Follow-ups

As a Sales Executive, I want follow-up tasks and reminders created automatically, so that I never miss a commitment to a customer.

Acceptance Criteria:

- AC1: Follow-up tasks must be created based on configured triggering events.
- AC2: The task must contain the relevant customer/contact and required follow-up information.
- AC3: The assigned Sales Executive must receive a notification/reminder.
- AC4: Users must be able to view upcoming and overdue follow-up tasks.
- AC5: Completed tasks must be marked as completed and retained in the customer activity history.
- AC6: The system must not create duplicate follow-up tasks for the same triggering event.

US-007 — Email Integration

As a Sales Executive, I want to send and receive emails directly from the CRM, so that all my customer communication is logged in one place.

Acceptance Criteria:

- AC1: Authorized users must be able to compose and send emails from the CRM.
- AC2: Emails sent from a customer/contact record must be associated with that record.
- AC3: Incoming emails from configured accounts must be associated with the relevant customer where matching rules identify the contact.
- AC4: Users must be able to view email history from the customer record.
- AC5: Failed email delivery must be clearly indicated to the user.
- AC6: Users must not be able to access email accounts or customer communications beyond their authorization.

US-008 — AI Lead Prioritization

As a Sales Executive, I want AI-driven suggestions on which leads to prioritize, so that I spend my time on the deals most likely to close.

Acceptance Criteria:

- AC1: The system must generate a priority/recommendation for eligible leads using configured criteria.
- AC2: Leads must be presented in an order that reflects their calculated priority.
- AC3: The user must be able to view the reason or key factors contributing to the recommendation where supported.
- AC4: Leads without sufficient data must not receive misleading recommendations.

- AC5: Users must be able to access the underlying lead information before taking action.
- AC6: AI recommendations must not automatically change the lead status without an approved business rule.

US-009 — Quote and Discount Approval

As a Sales Executive, I want to generate quotes with automatic discount-approval routing, so that I can move deals forward without bypassing pricing controls.

Acceptance Criteria:

- AC1: Users must be able to generate a quote for an eligible opportunity.
- AC2: The quote must contain configured products/services, pricing and applicable discounts.
- AC3: Discounts within the user's permitted threshold may proceed without additional approval.
- AC4: Discounts exceeding the user's permitted threshold must trigger an approval workflow.
- AC5: The request must be routed to the appropriate approver.
- AC6: The quote must not be finalized until required approval is received.
- AC7: Approval and rejection decisions must be recorded against the quote.
- AC8: Users must be notified of approval/rejection status.

US-010 — Unified Calendar

As a Sales Executive, I want a unified calendar synced with my meetings, calls, and tasks, so that I don't have to check multiple systems for my schedule.

Acceptance Criteria:

- AC1: Users must be able to view CRM meetings, calls and tasks in a unified calendar.
- AC2: Calendar events must display date, time, activity type and relevant customer information.
- AC3: Events created in the configured external calendar must synchronize with the CRM according to the defined synchronization rules.
- AC4: CRM-created events must synchronize with the connected calendar where two-way synchronization is supported.
- AC5: Synchronization failures must be reported to the user.
- AC6: Users must only see calendar information permitted by their access rights.

US-011 — Call Logging

As a Sales Executive, I want to log calls against a customer record, so that my team has a full picture of our conversations.

Acceptance Criteria:

- AC1: Users must be able to log a call against a customer/contact.
- AC2: The call record must capture the date, time, participants and outcome where applicable.
- AC3: Users must be able to add notes to the call record.
- AC4: The call must appear in the customer's activity history.
- AC5: Authorized team members must be able to view the call record.

- AC6: Required fields must be validated before the call record is saved.

US-012 — Meeting Scheduling

As a Sales Executive, I want to schedule meetings and send invites from the CRM, so that scheduling doesn't require switching tools.

Acceptance Criteria:

- AC1: Users must be able to create a meeting from the CRM.
- AC2: Users must be able to select date, time, participants and meeting details.
- AC3: The CRM must send invitations to selected participants through the configured calendar/email integration.
- AC4: The meeting must be associated with the relevant customer/contact.
- AC5: Meeting status must be updated based on configured responses/statuses.
- AC6: The meeting must appear in the customer's activity timeline.

US-013 — Customer Activity Timeline

As a Sales Executive, I want a single timeline of all customer activity, so that I get a 360-degree view without hunting across systems.

Acceptance Criteria:

- AC1: The system must display relevant customer activities in a unified timeline.
- AC2: The timeline must include configured activities such as calls, emails, meetings, notes, opportunities and support interactions.
- AC3: Activities must be displayed chronologically.
- AC4: Users must be able to distinguish between different activity types.
- AC5: Selecting an activity must display its relevant details.
- AC6: Users must only see activities they are authorized to access.

US-014 — Campaign Management

As a Marketing Executive, I want to create and track campaigns across channels, so that I can measure what's actually driving leads.

Acceptance Criteria:

- AC1: Authorized marketing users must be able to create campaigns.
- AC2: A campaign must capture required information such as campaign name, channel, target audience and dates.
- AC3: Users must be able to associate leads with the relevant campaign/source.
- AC4: The system must track configured campaign performance metrics.
- AC5: Users must be able to compare campaign performance.
- AC6: Campaign status must reflect its configured lifecycle.
- AC7: Users must be able to identify the source campaign associated with a lead where tracking data is available.

US-015 — Segmented Email Campaigns

As a Marketing Executive, I want to send templated email campaigns to segmented lists, so that my messaging is relevant and I can measure engagement.

Acceptance Criteria:

- AC1: Users must be able to select an approved email template.
- AC2: Users must be able to select an eligible customer segment.
- AC3: The system must prevent emails from being sent to contacts who are excluded according to configured consent/preferences.
- AC4: Users must be able to preview the campaign before sending.
- AC5: The system must record campaign delivery status.
- AC6: The system must track configured engagement metrics such as opens and clicks where supported.
- AC7: Campaign performance must be associated with the relevant campaign record.

US-016 — Customer Segmentation

As a Marketing Executive, I want to build customer segments from behavioral and demographic data, so that I can target the right audience for each campaign.

Acceptance Criteria:

- AC1: Users must be able to create a segment using approved customer attributes.
- AC2: Users must be able to combine multiple segmentation criteria.
- AC3: The system must display the resulting eligible customer count.
- AC4: Users must be able to save and reuse approved segments.
- AC5: Segment membership must update according to configured refresh rules.
- AC6: Users must only be able to use data they are authorized to access.

US-017 — Landing Pages and Lead Capture

As a Marketing Executive, I want to publish landing pages with lead-capture forms, so that campaign traffic converts directly into CRM leads.

Acceptance Criteria:

- AC1: Authorized users must be able to create/publish a landing page using an approved template.
- AC2: Users must be able to configure the lead-capture form fields.
- AC3: Mandatory fields must be validated before submission.
- AC4: A successful form submission must create or update a CRM lead according to duplicate rules.
- AC5: The lead must be associated with the relevant campaign/source.
- AC6: Users must receive confirmation after successful submission.
- AC7: Failed submissions must not create incomplete lead records.

US-018 — Automated Lead Nurturing

As a Marketing Executive, I want leads to move through an automated nurture sequence, so that they're warmed up before Sales invests time in them.

Acceptance Criteria:

- AC1: Authorized users must be able to define a nurture sequence using approved steps.
- AC2: Eligible leads must enter the nurture sequence based on configured criteria.
- AC3: The system must execute scheduled nurture activities according to the configured sequence.
- AC4: Lead engagement must be recorded against the lead/customer record.
- AC5: Leads meeting defined qualification criteria must be removed from the nurture sequence and routed to Sales.
- AC6: Leads that opt out must immediately stop receiving marketing communications.
- AC7: Marketing users must be able to view the current nurture status of a lead.
- AC8: Failed nurture activities must be logged for investigation.

Risk Register

ID	Risk	Probability	Impact	Mitigation / Response	Owner
RSK-001	Stakeholders have conflicting requirements	Medium	High	Conduct requirement workshops, document decisions and obtain business approval	BA / Sponsor
RSK-002	Requirements change during development	High	High	Maintain prioritized backlog, assess impact and prioritize changes through Product Owner	BA / PO
RSK-003	Business users have limited availability for requirement validation	Medium	High	Schedule sessions in advance and identify alternate SMEs	BA
RSK-004	Poor quality or duplicate existing customer/lead data	High	High	Define data-quality rules, validation and duplicate-detection requirements	BA / Data
RSK-005	Lead assignment rules are unclear or change frequently	Medium	High	Document business rules, exceptions and obtain Sales Manager approval	BA / Sales
RSK-006	Integration with lead sources is delayed	Medium	High	Identify integration dependencies early and define fallback/manual capture process	Architect / Dev
RSK-007	CRM functionality does not match actual business processes	Medium	High	Validate To-Be processes with business users and conduct UAT	BA / Business
RSK-008	UAT is delayed because business users are unavailable	Medium	High	Plan UAT early and nominate backup users	BA / Business

RSK-009	Scope expands beyond the initial CRM MVP	High	Medium	Define MVP scope and prioritize additional requirements in backlog	PO / Sponsor
RSK-010	Users resist adopting the new CRM	Medium	High	Involve users early, provide training and collect feedback	Business / BA
RSK-011	Incorrect role/permission configuration exposes data	Low	High	Define RBAC requirements and validate permissions during testing/UAT	Architect / Admin
RSK-012	Dashboard/reporting data is inaccurate	Medium	High	Define KPI calculations and validate reports against source data	BA / QA
RSK-013	Technical constraints require changes to requirements	Medium	Medium	Involve architect/developers during refinement and assess feasibility early	BA / Architect
RSK-014	Defects discovered late in UAT	Medium	High	Strong acceptance criteria, early QA testing and representative test data	QA / BA
RSK-015	CRM performance degrades as business volume grows	Low–Medium	High	Define scalability/performance NFRs and validate during technical testing	Architect / Dev
